

# RAMSPECK SEEKS MEMORIAL DRIVE

## Proposed Parkway Would Extend From Stone Mountain to Marietta.

WASHINGTON, June 16.—Representative Robert Ramspeck, of the fifth Georgia district, revealed today that he is seeking to have the memorial parkway built from the Stone Mountain memorial to the National cemetery at Marietta, through the Atlanta battlefields, the funds for the roadway to come out of the \$10,000,000 granted to Georgia under the relief act just passed by congress.

Congressman Ramspeck added that he had discussed the possibility of constructing other important roads in his district from the fund, which is designed primarily to relieve unemployment conditions.

"If constructed, the memorial highway should traverse a part of the site of the Battle of Atlanta," he said. "I also would like to see memorials erected along this route in honor of veterans of the Spanish and World Wars.

"I sincerely believe that if local authorities will secure the necessary rights of way, the proposed parkway can be built. It would furnish a magnificent drive around Atlanta to points north and east, and also would provide a new route to Marietta. Such a route is badly needed."

Other projects which Mr. Ramspeck has discussed with officials are completion of Route 9 to Dahlonega; a new route to Buford; the widening of the Warm Springs road through old Campbell county; a road from Decatur to McDonough; one from Conyers to McDonough and one from Conyers to Loganville.

"I also have asked the county commissioners of Fulton, DeKalb, Rockdale and the mayor of Atlanta," Ramspeck said, "to suggest to me such projects as they would like to have considered."
